THE LATE CONVENTION

A paper printed at Rillsboro Washington county, called, or mis-called, the Independent,

THE OBEGOVIAN even at this early date The Observation even at this early major realing its (included a Portland codspiracy etc. etc. But when it is considered by Thompson was a conditate of a Portland codspiracy etc. etc. But when it is considered by Thompson was a conditate for momination to that office and is a large holder of Observation Stock whicher sends will but the proper construction. thinking people will put the proper construction that paper sufferances. In view of these facts it would have been a little more becoming, in that hightened journal could it have acted in accord an ewith the literates of judgment and decenty au I bottle i its wasted gall.

THE ORNCOMEN has briefly criticised, though bying means in a "ritugerative way, the action of the republican convention that sat in this city on Wednesday and Thursday last. In doing the it has amply exercised its legitimate fund tion as an independent public newagaper. This justified on an independent public newagaper. This justified on a new an ellegiance to party bosses or to manufacture. So of conjections, nor is it estopped by any tule of law chetom or right from crit. cleany their work. They can't call it up, when they with a stray would call a dig with a wrise an the ogus that respond to the whistle need not expect it, nor trouble tien sel es map, was tarnitit.

The convention in former y was controlled by payons who have pursued this business for any persons of the long size become adepts in its arts and methods. The purpue t fo what there is in it, ap l us the same of parts and such plusses as "parts reg "5 " is to control the sa who have not thes, it is mage of describing the reserving Theories that it is a maxe men work the first bear the what it may be, or how is twist purposes it was nominately in the e wind they have non feet them be shown that it taket will have his including a partie in terral of which it is a mposed, and white is from the profession.

I fee but of the complex cond tions of business and of pu lie affirm that have grown up since profeer days, he has no knowledge or experience. The state wants in its executive office a mum who its knowledge of business and grasp of strains, which Cci Cornelius has not. Should he he elected governor he will know hittle about the affairs of the state, or the manner in which the business of the state may be con Jucked, because he has no experience in the methods and intricacies of business, and the 'ring' w L save its way with the administra wrings will have its way with the administra-tion, beauts she will a tknow how to hold at in-check. What he may know of the affairs of the safe will no supply what he is hold, and no if a rattle mails of what will be hold him way be no rel from the methods of the man-ge's for the who have made him their can-idate. Let it be repeated that no objection is originagaine him as a man. But to Col. (or nelius a pour major growing of the state through elius s normal governor of the state, through when the regency or rule with over the its criters and carry out its pure sea—the ring that attends to plates in 1 research way and works the state for what "business there is there is grant of obsection that will make itself let if the lemocrats should nomi

i i i f

NLWSPAPLKAACHIVE®.

etc. I fit is made eardin curtaing the; states with in the state. We still represent the first tellectric first pursuing but till be will be unanabetarise too but it the will be a number arts of the state that see a real hardstip. One of the the cut il last fear was between Funeville it. or by his mid takenevin I she county, a doubthee feath to miles. Such rusing is the great interest in it assert in and while the per wiation a small frequent communication performs in the needed of the continuous transfer of the needed of the continuous serveral purposes and its cost would be very 1 the Such service has been performed for several years but last fall the postumester general in the needed of conjoury cut it. If Letters from I rineville to Lakeview must go n ith 00 miles to The Balles, west 100 miles to P riland, south 3... miles to Ashind and east 0 miles to Lakeslew 0 ntwoof these stages of the in a uncertain and it often takes two weeks for a letter to make the journey of course business cannot stall these dolors and it sace not not precise for stackmon to send a special timer offset with a single letter. Now the believe that the send is single letter. special runer direct with a single letter. Now wo believe the government ought to do this tusings. It is quite true that the service would "to st more than it would come to," but it would got tward the development of the country and besides, it is i matter of justice to the people who live there and who pay their

part for the support of the government
Another notable instance of the edinomy
which is a real disadvantage to the state is the reduction of the mail service from Ashland, in Southern Oregon, east into Klamatic and Lake counties There is now only a tri-weekly mail from Asbland to Linkville, in Kiamath county, and from that point another tri-weekly raute to Lakeview The connections at Ashland and Linky lie are not negular, and not infrequently it takes Pertiand letters an outire week to reach

I pkeview This is a great hardship to the peo-ple and an obstacle to the settlement and devel-opment of the country. The natural connection of this reg on is with Oregon, but art ficial circumstances coppect it with California. From California there is a daily mail, and the time be Francisco and Lakevlew is alway tween ann Francisco and Lakeslew is always within five gad often within three days. The whole business correspondence of the country is naturally with fairforms. The people read chiforum newspapers, and their only connectum with Oregon is the political one. The people would like to deal with Oregon, but they cannot do it. The mail from Ashbard as frawing the country of the count council do it. The mail from Ashland eastware was formerly a daily service, and it should be made so again. It is a simple matter of justice.

THE DEAD HORSES OF REFORM

The state republican convention declared it self in favor of the "submission to the electors of the pending amendment to our state constitu tion respecting inquer traffic. While we do not believe it is of the singulest practical consequence to the cause of effective liquor lagisla-tion whether a prohibition amendment is imtion whether a prohibition amendment is im-ledded in the state constitution, or not, never-theless there is no objection to letting the pro-hi automate of all parties stand up and be counted. The publishment votes accessing in several states. New Yorkgest 30,547 votes for the prohibition candidates in 1885, or 5508 more of each than St. John received in 1885. On o cast 8 081 votes for prohibition in 1885 against 11,-669 for St. John in 1885. In Rhode Island, the prohibitionists. In wissely refusing to make a prohibitionish, by wisely refusing to make a third party novement, recently swept that stele. Of course the prohibition vote is an est of the temperance strength of the country, for a rast number of persons, anxious to shate since th y cannot abolish intemperance, favor stringent restrictive liquor legislation, and yet believe it best not to make it a last of party fa th and orthodox. Suppose there was a prohibitory amendment planted to-day in every state constitution and in the federal constitution

state constitution are in the intermediately of the sake of argument the assumption that it is the constitutional business of congrees to enact ligare legislation for the special states What good? What could be accom-plished that is not accomplished without the lassage of such amendments to the state and federal remaining. The state legislature can now pass an irone at open titre y statute if the people wish 1 , if such i kin was passed ils en forcement might prove i fince as it does to day in the cities and inter-towns of prohibition states, if the satute failed of its purpose of what we vice would be the constitutional amendment? The state satute and the amendment are both pulls feel it that better the constitutional amendment. fied if they lack the prop of public opinion It may be said hat the constitutional amendment might stand as a block against the masage of any license or local option law but of what avail would it bis? If the people were seriously in favor of one other liquot law rather than prints the and could not easily enact a change they would right the reserved to the could not easily enact a change they would right the reserved to that it a always consequent upon the passage of

leves that trans () express the weight of the aggressive public option of the majority. To illustrate in der the federal constitution every colored witer if the South has a right to vole at federal elections, and, if he only votes on e, to have his ballet act ofed us part of a fall fair count This is tie mait of every citizen, a right express colearly by statute and by amond ment, and yet the coronel viter is not per mitted to cast a free tillot tin corne get a fair count Why? Becaus the 1st whight of the rabing pointed and social forces of the south, the white, is "solat" in these era outlon to millify by force or fruit the federal a nendment and the sta ut a franchi to mfor e it

The same at the of one of the approximate of the same at the constitution, and all legislation from at the law is already lose not need the amount of the law is already lose not need the amount of the same at t ton, we are entirely withing that prohibition should be in ty experience that, as one good noting the introduction of the production as the gospel of hard fact worth more than a century of ser amendal theory concerning reform Some day whom prohibition has tested its theory by sufficient tild we shall arrive at the common sense conclusion that the republicans of Ohio and of New York have at last reached. that a discriminating tax in every establishment where either mait or distribed liquors are sold—con paratively light en mait liquors, and exceptionally heavy on distilled liquors, is the best legiela lon to regulate the traffic. To this might be coupled a local option bil. It is that of Massa-chusetts under which rund communities where the majority is a bapten to prefer prohibition

may have a chance it try the experiment of its enfercement under favorable circumstances. Under the laws of limous the citizens of every city and village in the state have the recurring right every spring to determine the government of the highest energy in the determine the government, of the highest energy trustees in favor of prohibition or high heenes. At the recent manicipal eletions an increase I miniber of towns an bablished the high tax, or Harper law for prohibition. the ligh tax, or Harper law for protitions in the light tax, or Harper law for protitions in such an extent in the light tax, lelviders, Woodstock, Rocatord, I in cir. M. Edwiders, Woodstock, Rocatord, I in cir. I would be not been party won only in fittle rural villages like vana. Plane, Montlefile, and Venus white the profile are generally testollars by the lift. In I wight, where he from the agent is the five by the party and the profile and party in the five year set. I investigate a
